Skillswise - BBC Teach

Ratio is the number of parts to a mix. For example, the paint mix is 4 parts, with 3 parts blue and 1 part white. The order in which a ratio is stated is important. For example, the ratio of screen wash to water is 1:10. This means that for every 1 measure of screen wash there are 10 measures of water.

Understanding ratio - BBC

Ratio and proportion quiz - BBC

Using ratio. Entry 1 & 2 Factsheet bbc.co.uk/skillswise © BBC 2012. Using ratio. Ratio tells us the size of two amounts compared to each other. The ratio always stays the same even if the amounts change. This might be written like this on the label 1:4. One part cleaning fluid to four parts water.

Using ratio - BBC

If we look at the example of mixing paint, the ratio is 3 pots blue to 1 pot white, or 3:1. But this amount of paint will only decorate 2 walls of a room. What if you wanted to decorate the whole room, 4 walls? You have to double the amount of paint and increase it in the same ratio. If we double the amount of blue paint we need 6 pots.

Understanding direct proportion - BBC
