The history of video games goes as far back as the early 1950s, when academic computer scientists began designing simple games and simulations as part of their research or just for recreation. At M.I.T. in the 1960s, professors and students played games such as 3D tic-tac-toe and Moon Landing. These games were played on computers such as the IBM 1560, and moves were made by means of punch cards.
