Yes you are correct that the actual PCV valve, or the piece that functions as such, is located in the valve cover. Yes if it is bad you have to get a whole new cover. Yes it is Stupid. I don't know if that is your issue though. Breathers do not replace the PCV valve. It changes the system from a closed loop system to an open system.

PCV Valve on 2005 | Modded Mustang Forums

The positive crankcase ventilation valve, or PCV valve, in your 2005 Chevy Trailblazer is used primarily for emission reduction purposes. The one way valve vents excess exhaust gasses that blow past the cylinders into the crank case below back into the engine for more complete burning. When this valve becomes too dirty and stops working, excessive pressure can build up inside your Trailblazer's crankcase and cause catastrophic gasket failure from extremely high crankcase pressures and ...
