OWL +USB Electricity Monitor - Customer Services

OWL "Standalone" Electricity Monitors are simple devices aimed at giving the householder a low cost, quick to install and easy to use device to help understand domestic electricity consumption. The monitor shows consumption or cost per hour (or kwh if preferred), and has a CO 2 equivalent reading too. Because the monitor is wireless and portable, the householder can easily walk around the house and observe, by switching on and off, how much energy particular devices are using.
